

- sCLOUD³ Backup, Recovery, & Network Appliance**
- 15 Minute Snapshots
 - 256-bit AES encryption
 - Windows 2000, 2003, and 2008 Support
 - Complete system restore
 - Database & application level recovery
 - Sync to external drive option
 - Multiple restore points local & offsite
 - Appliance doubles as a router/firewall
 - Web, spam, and content filter
 - Supported fully by gCLOUD3 engineers

- sCLOUD³ Bare Metal Restore**
- Virtual to physical restores
 - Virtual to virtual restores
 - Restore to dissimilar hardware
 - Integrated driver support
 - Multiple partition restores
 - Windows domain controller support
 - Backups can be used to migrate physical servers to virtual servers on gCLOUD3's private cloud server
 - Works with Windows Server 2000, 2003, and 2008

gBACKUP+ | Backup, Disaster Recovery, and Network Appliance Overview

- sCLOUD³ Standby Servers & Remote Cloud Backups**
- Runs directly on hypervisor
 - Virtualize a server in as little as 30 minutes
 - Hardware independent
 - Select a point-in-time snapshot just before failure
 - Backups occur during virtualization
 - Perform real or test virtualizations
 - Transfer base image via external drive
 - 256-bit AES encrypted tunnel
 - Error notification and reporting
